VOLUME 12: SKY HIGH SOARS HIGH!

About Super Powers, Part 1

According to my mother's account, I was said to have super powers when I was little (which isn't the case anymore). What kind of super powers you ask?

Well for instance, in the waiting room of the hospital, I suddenly disappeared into the shadow of the couch. And then my mother asked "What's up with this idiot?", and a doctor in his blouse would come. Apparently I hated doctors so much that I had the power to sense when someone was approaching (I could predict his arrival in some way). Unbelievable, right? I had a predisposition allowing me to detect doctors!

Snow white

Mother goat and her seven goat children

These are not the enemy stands, but pre-existing ***characters***

① A stand ability that makes characters from animation, printed material, movies or any piece of art come to life.

② The ability uses the energy used to make these characters, so its range is infinite and extends throughout the whole world.

③ If a person meets a character they like, their ***soul*** gets sucked into the character's world.

④ The ***soul*** that's been split from the body is doomed to follow the same fate as their designated character.

I'M A PORTRAIT OF HIM AFTER HE CUT OFF HIS EAR...

A OR B?

HEY, HOW MANY PORTRAITS, DO YOU THINK?

FINAL ANSWER?

A: 0-5, OR B: 40-45. WHICH ONE IS IT, A OR B?

VAN GOGH BARELY SOLD ANY OF HIS PAINTINGS WHILE HE WAS ALIVE, BUT ARE YOU AWARE OF HOW MANY SELF-PORTRAITS HE PAINTED THROUGHOUT HIS LIFE?

THIS EVENT OCCURRED 11 YEARS AGO, IN THE SPRING OF 2000...

THERE IS AN ENORMOUS PIT CAVE IN SAN LUIS POTOSI, MEXIO, CALLED ***SÓTANO DE LAS GOLONDRINAS.***

THEY DIDN'T NOTICE IT AT THE TIME, BUT, AS SEEN IN THE FOOTAGE LATER...

A GROUP OF SKYDIVERS FILMED THEIR JUMP DOWN THIS CAVE, AND UPON WATCHING THEIR FOOTAGE, FOUND A ***CURIOUS OBJECT*** CAUGHT ON FILM, FOR A SPLIT SECOND...

THEY NOTICED THE NUMEROUS ***WHITE OBJECTS*** FLOATING THROUGH THE AIR, WEAVING IN BETWEEN THE SKYDIVERS.

LET ME SAY NOW THAT I'M JUST RELAYING TO YOU THE FACTS.

ACCORDING TO THE TIMER ON THE CAMCORDER, THE OBJECTS WERE ONLY THERE FOR MERE HUNDREDTHS OF A SECOND.

THOSE WERE ***RODS***...LATER, JAPANESE REPORTERS ATTEMPTED TO CAPTURE THEM, BUT FAILED. HOWEVER, FROM WHAT THE REPORTERS CAUGHT ON TAPE OF THEM, THEY CONCLUDED THAT THE ***RODS*** WERE ***ORGANISMS***.

AND BECAUSE OF THEIR SPEED, THE DIVERS HADN'T BEEN ABLE TO SEE THEM WITH THE NAKED EYE.

IT SEEMS THAT THESE ***RODS***... FROM WHAT I'VE READ OF YOUR DISC...

IT MOVES FROM CLIFF TO CLIFF, WITHOUT COLLIDING WITH OTHER RODS OR ANYTHING ELSE.

IT WAS JUST THAT NO ONE HAD BEEN ABLE TO SIGHT IT, BECAUSE OF ITS INCREDIBLE SPEED.

RUMORS ABOUT THIS MYSTERIOUS ORGANISM HAD ALREADY BEEN AROUND FOR A WHILE IN THE TOWN OF GOLONDRINAS...

PRIVILEGE CARD

Name: Rykiel

Born in 1988. his father is the vampire DIO (refer to Jojo's Bizarre Adventure Part 3. ***Stardust Crusaders***). His mother is assumed to be one of DIO'S victims. Rykiel came to florida. because he was mysteriously drawn to father pucci. he had no hope for his future. and was quite spiritually damaged. this emulated itself physically as well. such as his falling eyelids and his labored breathing. but with the discovery of his power ***sky high*** and his ***rods***. he found that he could concentrate better than he ever had before. he finally founda way to unleash his true potential.

Giorno giovanna. (refer to Jojo's Bizarre Adventure Part 5. ***Golden Wind***). is also a son of dio. but then. why was he not drawn to the priest as well? This is a mystery. but... perhaps he is already somewhere in florida...

WHICH PART OF HER BODY SHOULD I COOL IN ORDER TO STOP HER?!

ドドド

ドドド

MY SPIRITUAL STRENGTH CAN'T BE LESS THAN HER! THINK ABOUT DIO! WHAT'S MOST IMPORTANT IS MY GROWTH!

A mysterious organism with the ability to fly at 200kph.

THE RODS

No complete carcass or even fossil has ever been found, so this is all emporio's speculations.

There are 4 wings on each side, so in total, there are 8.

Their average flying speed is over 200KPH. Therefore, it is impossible to see them unless you're freefalling from a helicopter, or riding in a supercar.

Mouth cavity (used to intake trace nutrients and water, can also expel waste)

The males procreate with the females in midair by extending something similar to tentacles, like snails.

Females hatch their eggs in midair.

Experts would probably be able to discern the difference between males and females.

Heat-sensing organs

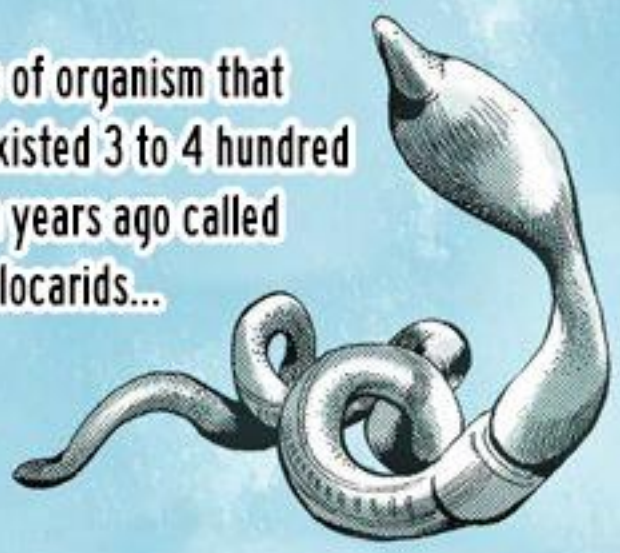
Nose (very sensitive to smell)

Inside their bodies, they have something similar to a kidney or intestines to expel waste from its bloodstream (It could also be for heat regulation)... and the waste, which is in the form of a liquid, is an excellent agent for heat-retention. this waste product is similar to the heat-retention ***clay*** that nasa has invented to use in space.

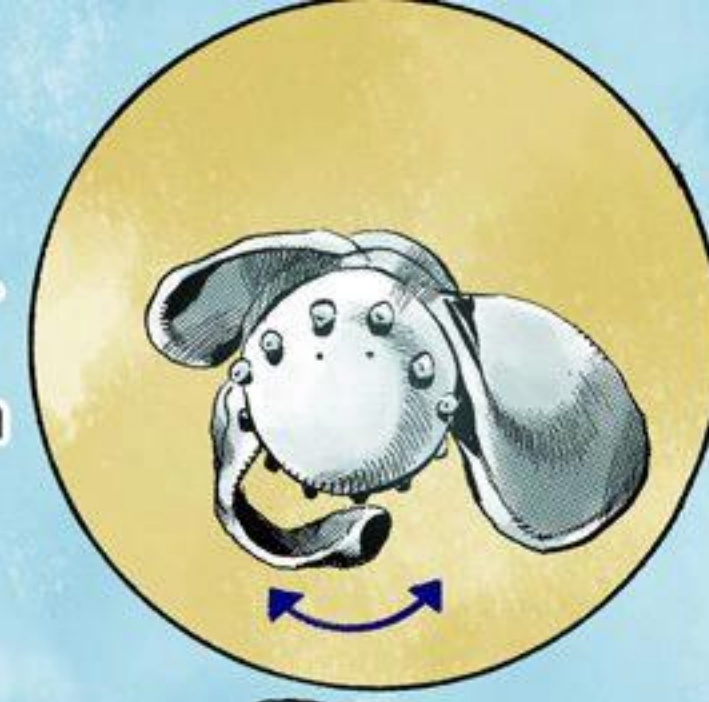
There is no sense of ***front*** or ***back*** to rods, but the direction of their movement depends on which way the wings are turning.

Their corpses immediately decompose into nothing.

A type of organism that first existed 3 to 4 hundred million years ago called anomalocarids...



The wings rotate like propellers. each time the rod folds and unfolds its wings the body will spin a total of around 455 degrees.



(An organism that is somewhere between being a vertebrate and an invertebrate) ...is supposedly the rods' ancestor. during the reign of the dinosaurs (probably the Jurassic period). It is assumed that they targeted aquatic dinosaurs before they move to the skies. their areas of habitat are shown on the world map below.

It's form of sustenance is to absorb the ***body heat*** of other organisms and use it to fuel its own body.

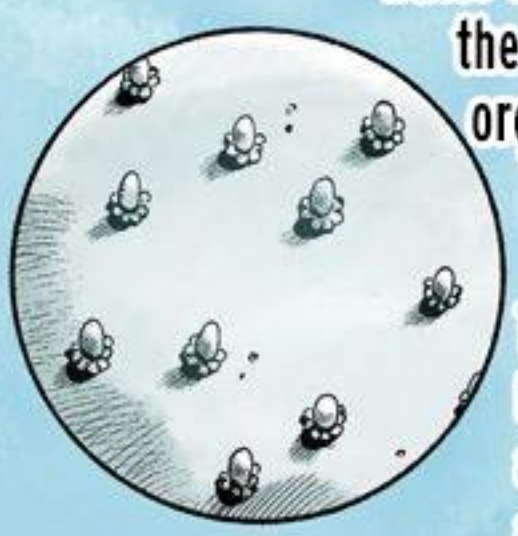
Normally. organisms who move so rapidly would need to metabolize food quickly to create more energy. but the ***rods*** are able to survive off the energy of other organisms.

Rykiel's Stand name:

SKY HIGH:

His ability is to control the ***rods*** with a remote-control like stand. ryklel determines the target himself. and the more focused his attacks are. the more damage it incurs.

The surface of their bodies are lined with heat-absorbing cells (see diagram below). and. like cactuses that absorb water through their pores. the rods fly past other organisms and absorb their ***body heat***.



The organism is not overly affecte by this. however if the rods start absorb heat from one concentrate area. that area becomes prone to disease.
